PROFILE INFO

I am a seasoned web developer with a robust background in backend development, offering a wealth of experience. My focus lies in crafting dynamic and responsive web applications using state-of-the-art technologies. Furthermore, I possess comprehensive knowledge in computer systems and networks. Currently pursuing a master's degree in web science, I am dedicated to broadening my digital footprint and consistently delivering exceptional results in every project I undertake.

EDUCATION HISTORY

Syrian Virtual University | Master's in Web Science
Expected Completion: 4, 2024

- "I am currently working on a thesis entitled 'Developing a Smart Real Estate Services Platform in Syria', supervised by Dr. Majeda Bakour."

Al Baath University | Bachelor of Computer Systems & Networks Engineering First year - 2014 | GPA: 80%

- My graduation project was titled "Developing an E-Commerce Website using the PHP Laravel Framework" and was supervised by Dr. Zainab Kallouf. It achieved a score of 94 out of 100.

MY AWARD

2018-2019: Recognized as a top three college-level 4th-year project for creating a specialized application facilitating meal reservations within a renowned restaurant in Homs. Streamlined the booking process, optimizing customer experience and operational efficiency in the hospitality industry.

2019-2020: Garnered recognition among the top three college-level graduation projects for successfully conceptualizing and implementing an innovative e-commerce website utilizing the PHP Laravel framework. Demonstrated proficient skills in web development, showcasing expertise in leveraging modern technologies to deliver a robust and user-friendly online commerce platform.

2021-2022: Led the development of a comprehensive legal consultancy website for the Justice Palace in Syria as part of a top three graduation project. Mentored and collaborated with motivated students to bring the project to success.

💼 WORK EXPERIENCE

Freelancer 2015-2025

- As an independent PHP Laravel Developer, I have successfully delivered projects for clients from a diverse range of countries, including Canada, the United Arab Emirates, Spain, Iraq, Algeria, Germany, the Netherlands, and Saudi Arabia. In addition to my development work, I have experience as a CCNA R&S, CCNA Security, and CCNP Trainer.
- Currently, I am working as a PHP Laravel Developer on an innovative online education platform based in Algeria, where I am responsible for designing, developing, and maintaining scalable web applications that enhance the learning experience for students.

Trainer, Syria - Homs 2018-2019

- I worked as a trainer for CCNA R&S, CCNA Security, and CCNP.

💼 PROFESSIONAL EXPERIENCE

Laravel Developer 2018-2023

- Developed multiple e-commerce websites as part of ongoing personal learning and skill development, implementing best practices in web development and user experience.
- Leading the development of a multi-investor e-commerce platform, focusing on scalable architecture and seamless user interactions.
- Building a social media platform inspired by Instagram, with advanced features for user engagement and content sharing.
- Designed and implemented a web application for efficient family expense tracking and management, providing intuitive data visualization and reporting tools.
- Developed an online platform streamlining visa application processes for the Kingdom of Saudi Arabia, enhancing user accessibility and operational efficiency.

Wordpress 2022–Present

- Gained professional expertise in WordPress development, delivering custom themes, plugins, and optimized websites to meet diverse client requirements.

Web Developer, Bedaya Investment (UAE, Abu Dhabi) – 2022

- Developed and launched the official website for Bedaya Investment, ensuring a responsive and user-friendly experience.
- Currently planning and implementing new features, including an integrated "Make Appointment" service, to enhance client engagement and streamline communication.
- Ongoing responsibility for website maintenance, performance optimization, and regular content updates.

Web Developer, Albaray Official Website (UAE, Sharjah) - 2023

- Led the development and launch of the official website for Al Barari Industries, delivering a modern and responsive online presence tailored to the client's needs.
- Collaborated closely with stakeholders to ensure the website accurately reflects the company's brand and facilitates seamless user interaction.

Web Developer, Deutsch-Syrisches Official Website (Germany) – 2023–Present

- Developed the official website for Deutsch-Syrisches, providing a professional digital platform for the organization in Germany.
- Currently leading a major update in 2025 at the company's request, implementing new features and design improvements to enhance functionality, user experience, and site performance.

Web Developer, YITD Center (Erbil) – 2023

- Led the end-to-end development of the official website for YITD Center, an organization specializing in articles, seminars, and medical conferences.
- Delivered a dynamic and user-friendly platform that effectively showcases the center's resources and events, supporting their mission in the medical field.

Web Developer, Youth Ambitious (Germany) – 2023

- I am presently involved in the development of the Youth Ambitious website, which serves as the online platform for an organization specializing in educational travel and study programs within Germany.

Chalet Booking System (Palestine) – 2023

- Developed a comprehensive web-based platform for booking chalets in Palestine, offering users an intuitive interface to browse, reserve, and manage chalet accommodations. The system streamlines the booking process for both customers and property owners, enhancing convenience and efficiency in the local hospitality sector.

Alghry Company Website (Iraq) – 2023

- Developed the official website for Alghry Company, a leading provider of profiles and accessories, aluminum PVC, and steel solutions for doors, windows, and railings. The platform showcases the company's products and services, facilitating customer inquiries and enhancing the company's digital presence.

Alrawasy Company Website (Iraq) – 2023

- Designed and developed the official website for Alrawasy Company, specializing in the import and export of jewelry. The website features product showcases and streamlined communication channels to support international business operations and customer engagement.

Madhi Company Website (UAE) – 2024

- Developed the official website for Madhi Company, a real estate services provider with multiple branches across the United Arab Emirates. The platform offers property listings, detailed service information, and easy inquiry options, supporting the company's operations and client engagement throughout the UAE.

Babil Gold Trading & Jewelry (Iraq) – 2024

- Designed and developed the website for Babil Company, a limited liability company specializing in gold trading and jewelry crafting. The platform highlights the company's offerings, facilitates customer inquiries, and strengthens its presence in the Iraqi gold market.

AutoCare Appointment Booking Platform (2024)

- Developed an online appointment system for car maintenance and repair services, enabling customers to easily book service slots. The platform offers a comprehensive suite of services including engine repair, battery inspection, air conditioning filter replacement, wheel alignment and balancing, brake repair, transmission service, suspension repair, spark plug replacement, full electrical diagnostics, cleaning and tuning, wheel refurbishment, pre-purchase inspections, custom exhaust tuning, painting and thermal insulation, dent removal, and bodywork repair.

Quick Numbers Platform (Syrian Arab Republic) – 2024

- Developed a specialized website for Quick Numbers, offering online mobile top-up and game credit recharge services. The platform provides users with a secure and user-friendly experience for purchasing balance and game credits, streamlining digital payments and enhancing convenience.

Bashiq Company Website (Iraq) – 2024

- Developed the official website for Bashiq Company, specializing in the trade and investment of gold bars. The platform educates customers about the benefits of investing in gold bullion—highlighting advantages such as no manufacturing costs compared to gold jewelry, and only applicable taxes—while facilitating inquiries and sales.

Al Shifa Medical Services Website (Turkey) – 2024

- Developed the official website for Al Shifa Medical Services, specializing in comprehensive eye care solutions. The platform guides patients through every step of their treatment journey—from appointment booking and airport pickup, to hotel reservations and surgery scheduling—offering a seamless and reassuring experience for international patients.

Murray Company Website (UAE) – 2024

- Developed the official website for Murray Company, a provider of professional programming and design services in the UAE. The platform showcases the company's innovative technical and creative solutions, emphasizing a commitment to delivering high-quality, effective results tailored to client needs.

Sumo Al Diwan Company Website (Iraq) – 2024

- Developed the official website for Sumo Al Diwan Company, offering a wide range of high-quality aluminum products tailored for windows and doors. The platform enables customers to explore product options and easily connect with the company for the best offers and services.

Golden Sands Company Website (Iraq) – 2024

- Developed the official website for Golden Sands Company, dedicated to providing secure and profitable gold investment solutions for individuals and businesses. The platform highlights the company's expert team, tailored services, and commitment to delivering a trustworthy and seamless investment experience in the gold market.

T.A.S.K. Motors Booking Platform (Canada) – 2024

- Developed a custom online booking system for T.A.S.K. Motors, a Canadian auto repair center. The platform allows customers to easily schedule maintenance and repair services, improving workflow efficiency and enhancing customer experience through streamlined digital interaction.

Al Rukham Company Website (Iraq) – 2024

- Developed the official website for Al Rukham Company, specializing in the import of gold. The platform effectively showcases the company's offerings and streamlines communication with clients, supporting business growth and enhancing its presence in the gold import sector.

Fortune Wheel Discount System (Canada) – 2024

- Built an interactive web-based Fortune Wheel system for a Canadian restaurant, enabling customers to spin the wheel upon entry and receive randomized meal discounts. The system allows restaurant managers to manage meals and discounts dynamically, with secure code generation for instant redemption—adding gamification and engagement to the dining experience.

Sama Al Ghary Company Website (Iraq) – 2025

- Designed and developed the official website for Sama Al Ghary, a limited liability company specializing in the import and manufacturing of gold. The platform presents the company's products and services with a focus on professionalism, security, and ease of access for both individual and wholesale clients.

Banking Operations Management System (UAE, Abu Dhabi) – 2025

- Designed and developed a comprehensive internal system for a financial institution in Abu Dhabi, UAE. The system manages all core banking operations, including receipts, payments, client and agent records, employee management, expenses, and payroll. Built with a focus on security, efficiency, and scalability to support the daily financial and administrative workflows of the organization.

Game & Credit Recharge Platform (Syrian Arab Republic) – 2025

- Developed a full-featured website for recharging mobile credit, internet bundles, and gaming services in Syria. The platform offers a smooth and secure user experience, allowing customers to select from various digital services and complete transactions easily. Designed to handle high user demand with reliable performance and secure payment integration.

Custom Web Solutions for Health Organizations (Saudi Arabia) – 2025

- Delivered a range of tailored web services for multiple health-focused organizations in Saudi Arabia. These included developing and enhancing websites to support healthcare initiatives, appointment systems, service directories, and informational platforms—ensuring compliance with health sector standards and improving user accessibility and operational efficiency.

Dental Services Website for a Startup (Syria, Damascus) – 2025

- Designed and developed a comprehensive website for a dental startup in Damascus, featuring a modern presentation of services and specialties. The platform includes an integrated appointment booking system and a professional email communication module within the admin panel, allowing the clinic to send pre-programmed, branded messages to other companies worldwide—enhancing both local outreach and international networking.

MF Company E-Commerce Website (Iraq) – 2025

- Developed a full-featured e-commerce platform for MF Company, offering a seamless online shopping experience with product browsing, cart management, and secure checkout functionality. The platform was tailored to meet the company's operational needs and enhance customer engagement.

SAE Clothing Store Website (Iraq) — 2025

- Designed and built a dedicated e-commerce website for SAE Company, specializing in apparel sales. The site features product categorization, responsive design, and user-friendly navigation, enabling customers to browse and purchase clothing items easily across all devices.

Automated CV Submission & Generation Platform (UAE, Abu Dhabi) — 2025

- Developed a fully integrated platform for streamlining employee applications, allowing candidates to submit their information and automatically generate professional CVs using content generation technologies. The system ensures companies receive standardized, well-formatted resumes, improving the recruitment process and enhancing data consistency across applicants.

Visa & Residency Booking Platform (Germany) — 2025 – Ongoing

- Currently developing a specialized platform for booking visa and residency services in Germany. The system is designed to streamline user requests, guide them through documentation processes, and facilitate communication with legal and immigration consultants.

Ashbal Al-Tamayoz Academy Platform (Algeria) — 2025 – Ongoing

- Building a comprehensive online education platform for Ashbal Al-Tamayoz Academy. The system includes dedicated sections for students, trainers, consultants, and administrators—providing a complete virtual learning environment with course management, user roles, and interactive features to support remote education.

GCC AI Media Platform (United Kingdom) — 2025 – Ongoing

- Developing an advanced platform under the GCC brand in the UK, leveraging artificial intelligence to generate images, videos, and written content. The system integrates state-of-the-art AI technologies to support creative professionals and businesses in high-quality, automated content creation.

Digital Library Platform (Syrian Arab Republic) — 2025 – Ongoing

- Designing a fully integrated digital library platform for users in Syria, allowing visitors to browse, purchase, and access a wide collection of books online. The platform aims to promote reading and provide easy access to diverse literary and academic resources.

Proposed Veterinary Pharma Platform for Alpha Zoo (Syria – Idlib & Aleppo) – 2025

- Proposed the development of a comprehensive digital platform for Alpha Zoo, a veterinary pharmaceutical company operating in Idlib and Aleppo. The platform aims to showcase product lines, facilitate distributor and clinic communication, and manage orders and inventory—enhancing the company's digital reach and operational efficiency in the veterinary sector.
